

# Technical Data Sheet

## InVivoMAb anti-mouse MHC Class II ( $\beta$ chain)

**Attention:** Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at <https://bioxcell.com/terms-and-conditions>.

### Lot Specific Information

Lot Number: Lot Specific\*  
Volume: Lot Specific\*  
Concentration: Lot Specific\* (generally 4 to 11 mg/ml) \*  
Total Protein: Lot Specific\*

\*This information will be noted on the certificate of analysis that ships with this product.

### Product Information

Catalog Number: **BE0140**  
Clone: **KL277**  
Isotype: Hamster/Mouse IgG  
Recommended Dilution Buffer: InVivoPure pH 7.0 Dilution Buffer  
Immunogen: Synthetic peptide corresponding to residues 146-177 of the mouse Ab/beta protein  
Reported Applications: Western blot  
Formulation: PBS, pH 7.0  
Contains no stabilizers or preservatives  
Endotoxin: <2EU/mg (<0.002EU/ $\mu$ g)  
Determined by LAL gel clotting assay  
Purity: >95%  
Determined by SDS-PAGE  
Sterility: 0.2  $\mu$ m filtered  
Production: Purified from cell culture supernatant in an animal-free facility  
Purification: Protein G  
RRID: [AB\\_10951148](https://eutils.ncbi.nlm.nih.gov/entrez/eutils/rrid.cgi?db=AB_10951148)  
Molecular Weight: 150 kDa

### Description

The KL277 monoclonal antibody reacts with mouse MHC Class II haplotypes I-Ab, I-Ad, I-Ap, I-Aq, I-Abu, and I-Abw. The antibody does not react with I-Aa, I-Ak, I-Af, I-Aj, I-As, or I-AtI haplotypes.

### Storage

Store at the stock concentration at 4°C . **Do not freeze.**

It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at <https://bioxcell.com/faqs>.

### Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
